## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Drawings*

2. Drawings submitted on 7/29/03 have been approved by the examiner.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

**Claims 1 and 10-14** are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 7,068,843 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because each of the limitations of the instant claims is variously set forth by

the claims of the patent No. 7,068,843 B2. Because anticipation is the epitome of obviousness, the invention defined in the claims of the instant application is obvious in view of the invention claimed in the Patent No. 7, 068,843 B2. Specifically, claims 1 and 4 of the Patent No. 7,068,843 B2 include each of the limitations of the independent claim 1 of the instant application. While claim 1 of the Patent include additional limitations not specifically recited by the claim 1 of the instant application, the use of the transitional term "comprising" in the instant claims fails to preclude the possibility of additional elements or features, so that instant claim 1 is anticipated by claims 1 and 4 of the Patent. Claims 2-6 of the Patent are identical to the corresponding dependent claims 10-14 of the instant application, so that these claims are also fully anticipated by the claims of the Patent No. 7,068,843 B2.

***Allowable Subject Matter***

4. **Claims 2-9** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Other prior art cited**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gourdol (US 5,594,810) discloses a method and apparatus for recognizing gestures on a computer system.

Doi et al. (US 6,456,728 B1) disclose an object detection apparatus, motion control apparatus and pattern recognition apparatus.
